

Frequently Asked Questions

1. **Can I submit an entry that uses more than one class element?**

Yes, however, the predominate element used should fit into one of the classes (i.e., watercolor, crayons, pen and ink, pencil, marker, acrylic, special effect or computer enhanced.)

For example, if a poster uses primarily watercolor paint, but outlines each image in marker, then that poster would be submitted into the watercolor class.

2. **What are some additional ideas that may fall into one of the three themes: Healthy Lifestyles, S.E.T. and Citizenship?**

Additional ideas on better understanding the themes can come from the Florida 4-H project Web page at: <http://florida4h.org/projects/index.shtml>.

For example, Healthy Lifestyles project area includes topics on food and nutrition, food preparation, food science and health and safety. Science, Engineering and Technology topics can include anything under plant science, environmental sciences, animal sciences and the general category of science and technology. Citizenship can include community service, advocacy, youth serving in leadership roles in their community, government and world; and youth-adult partnerships.
