

The University of Florida 4-H Youth Development Program is pleased to present you with an opportunity to experience...

Project Butterfly WINGS

Project Butterfly WINGS provides 4-H youth ages 9 - 13 with the opportunity to explore the outdoors through guided inquiry, while learning to identify common butterflies and contribute to science.

The Youth Guide has a wide range of engaging activities. Youth explore the outdoors through their senses, play butterfly detective, create site maps of their favorite butterfly-watching places, and ultimately embark on a "Question Quest" - a discovery project youth design based on what interests them about butterflies.

Through these activities, youth learn the steps in the science inquiry process, while becoming critical thinkers and decision makers. In addition to science content and skills, youth employ a number of 4-H skills in WINGS including self-confidence, problem solving, learning to learn, ethics, and communication.

For a limited time, Florida 4-H Youth Development Program is pleased to provide complementary copies of the WINGS project Youth Guide and Leader Guides for either club or group use. A complimentary set will consist of **1 Leader Guide** and **10 Youth Guides**. The requestor must include their name, the county, the name of the club/group in which the project will be used (with the club/group having properly registered through Florida Online registration).
